Bank of England Again Secures All Arrivals of South African Gold in London.

itating and irregular in the efforts of the professional traders to grope for an effective leadership. The incident that had most to do with curbing the demand which started early prices upwards was the character of selling in Amalgamated Copper and Anaconda. This was so decisive as to indicate a determination to put restraint on any upward movement of those stocks in the market. Such a demonstration was interpreted as intended to herald the market attitude of an important financial following. The traders turned to the short side of the market or reduced long commitments in response to this supposed admonition. The market also was confronted with the news that the Bank of England had again secured all of the arrivals of South African gold in London, thus belying the confident expectation of last week that the inward movement of gold would begin this week.

The day's rumors to-day were largely dealing with supposed coming notes, izsues of which the extent and variety were said to be great. No authoritative announcements followed the rumors. The compilation of national bank returns to the comptroller, received from Washington to-day, claimed the principal interest on account of the increasing excess of the loan item over the individual deposits. In fact, compared with the previous statement of November 12th, there has been an actual shrinkage in the deposit item of over \$174,000,000, while loans have expanded in the same time \$7,222,333, and over, January last year upwards of \$392,000,000, it is because of this movement of the deposit item that the banks, while showing a decrease of some \$6,000,000 eline November in their cash hold- gs, accepted to the reserve to deposits from 20.80 per cent. to 21.53 per cent. Money was firm to-day, both for call and time leans.

The selling paused at intervals, but per cent. to 21.53 per cent. money was firm to-day, both for call and time

The selling paused at intervals, but was renewed before any important recoverles ensued, except the final covering movement amongst the bear, which brought the market to a firm closing.

#### COTTON MARKET.

NEW YORK, February 18.—The cotton market was nervous and unsettled during to-day's session owing to near months. Trading was not active, however, and the market closed steady at a net decline of 365 points on the active old crop months, and about unchanged to 2 points higher on later positions. Sales for the day were estimated at 125,000 bales.

The market boned steady at a seclina of 1@3 points, and right after the call worked up to a net advance of about 194 points, led by the new crop months, for which there was foreign buying orders. Cables made a pretty steady showing, and rumors of sales from the local stock may have helped the advance, which was quickly cincked on receipt of the house estimate for to-morrow's receipts showing a heavy movement. This was followed by liquidation of March contracts through wire and commission houses, and while there was some buy-

ing by spot interests on a scale down the decline was continued until March sold at 9.15 and May at 9.33, or within 7 or 8 points of the low record for the season. At this level the demand for March increased slightly, and during the balance of the season the market was steadier by covering. There seemed to be little rallying power in the face of the large movement, however, but the close was only 3 or 4 points up from the lowest. Southern spot markets were runners of an easier feeling by holder sof the lower grades in the South alxaperts so far for the season are about half a million bales ahead of the record during the big crop year.

NEW YORK PRODUCE MARKET.

THE LOCAL MARKETS LIGHT BREAKS OF MARKET VERY STRONG

LEAF TOBACCO TO-DAY

The tobacco warehousemen do not ook for large breaks to-day. Tho stocks that came by rail are rather small, and wagon deliveries last night for to-day's breaks were quite small. However, all the warehouses will have sales, and what may be lacking in quantity may be largely made up in quality. The sun-cured stock now in hand and to be put on the breaks this morning is of the better quality, and the buyers who are in search of good wrappers and fillers will find some small lots that will interest them.

The first sale will be at Crenshaw's; second at Shelburne's; third at Stonewall, and fourth at Shockoe.

MARKET VERY STRONG Receipts on the produce and fruit market were rather light yeaterday, hardly equaling the demand, which was very active. As a consequence, there was a slight hardening of prices. Nothing except eggs was quotably ligher, but everything was stiff all the day. Eggs went up a cent, and crâte lots were readily sold to. from 23 to 24 cents. Poultry was in active demand at former quotations. Florida fruits and vegetables were quickly taken at outside figures. Fruits of sil kinds were firm, but not quotably higher. higher, The commission merchants look for

larger receipts to-day and to-morrow, and they need them to fill the orders that are coming in from all quarters
